

# Transform your power emergency to peace of mind

Who better to trust your transformer emergency to than the experts who pioneered transformer repairs?

Since 1912, ELSCO has manufactured, repaired, reconditioned and rented nearly half a million transformers – many of them dry-type transformers. Here's how we help transform your needs to a peace-of-mind solution:

- Engineering improvements for superior quality, reliability and durability
- Application of the latest technology, materials and computerized designs
- 24-hour access to knowledgeable experts
- Repair and remanufacture of transformers rated to 500 through 3750 kVA
- Four-week average turnaround on repairs
- Rental transformer available while yours is down
- A “service is in everything we do” commitment

## What we repair and remanufacture

- Dry-type transformers
- Oil-filled transformers – padmounts, station types, unit substations
- Oil and dry reactors
- DC rectifiers

**Transformers are all we do.**

**Keeping you powered up with confidence is why.**
